

Dokan-ERP Mobile API Integration Status

Generated from the current repository source on 2026-06-29.

Scope

- - Backend source checked: backend/src/app.ts and backend/src/routes/*.ts
- - Mobile source checked: mobile/lib/core/constants/api_endpoints.dart,
- mobile/lib/data/network/erp_remote_data_source.dart, and all
- mobile/lib/modules/**/data/datasources/*remote*.dart files
- - Base API scope for mobile: '/app/api'

How To Read This

- - Integrated means the mobile app has a real caller and the backend route exists with a matching path/method.
- - Needs Fix means mobile code calls an API, but the backend path or method does not match the current backend implementation.
- - Need To Integrate means the backend already exposes the route under /app/api, but the current mobile app has no direct caller for it.

Integrated APIs

Auth

Mobile source: mobile/lib/modules/auth/data/datasources/auth_remote_data_source.dart and mobile/lib/data/network/api_providers.dart

- - POST /app/api/auth/login
- - POST /app/api/auth/register-owner
- - POST /app/api/auth/check-mobile
- - POST /app/api/auth/send-otp
- - POST /app/api/auth/verify-otp
- - POST /app/api/auth/refresh
- - POST /app/api/auth/logout
- - GET /app/api/auth/me

Customers And Sales

Mobile source:

mobile/lib/modules/customers/data/datasources/customer_remote_data_source.dart, mobile/lib/modules/sales/data/datasources/sales_remote_data_source.dart, and mobile/lib/modules/sales/presentation/screens/parts/sales_screens_pos_checkout.dart

- - GET /app/api/customers
- - POST /app/api/customers
- - GET /app/api/customers/:id
- - POST /app/api/customers/:id/payments

- - GET /app/api/customers/sales
- - POST /app/api/customers/sales
- - POST /app/api/customers/sales/:saleId/cancel
- - POST /app/api/customers/send-due-otp
- - POST /app/api/customers/verify-due-otp

Products, Categories, Shop Catalog, And Stock Movement

Mobile source:

mobile/lib/modules/products/data/datasources/product_remote_data_source.dart and
mobile/lib/modules/products/data/datasources/quick_setup_catalog_remote_data_source.dart

- - GET /app/api/products
- - POST /app/api/products
- - GET /app/api/products/:id
- - PATCH /app/api/products/:id
- - DELETE /app/api/products/:id
- - GET /app/api/categories
- - POST /app/api/categories
- - DELETE /app/api/categories/:id
- - GET /app/api/shops/products
- - GET /app/api/inventory/stock-movements
- - POST /app/api/inventory/stock-movements
- - GET /app/api/shops/quick-setup/catalog
- - POST /app/api/shops/quick-setup/catalog/select
- - PATCH /app/api/shops/quick-setup/catalog/pricing

Purchases

Mobile source:

mobile/lib/modules/purchases/data/datasources/purchase_remote_data_source.dart

- - GET /app/api/purchases
- - POST /app/api/purchases
- - GET /app/api/purchases/:id
- - POST /app/api/purchases/:id/receive
- - POST /app/api/purchases/:id/cancel
- - POST /app/api/purchases/:id/returns

Suppliers

Mobile source:

mobile/lib/modules/suppliers/data/datasources/supplier_remote_data_source.dart

- - GET /app/api/suppliers
- - POST /app/api/suppliers
- - DELETE /app/api/suppliers/:id
- - GET /app/api/suppliers/:id/ledger

- - POST /app/api/suppliers/:id/payments

Expenses

Mobile source:

mobile/lib/modules/expenses/data/datasources/expense_remote_data_source.dart

- - GET /app/api/expenses

- - POST /app/api/expenses

Business Settings, Subscription, Inventory Layout, Staff, Notifications

Mobile source: mobile/lib/modules/settings/data/datasources/*.dart and

mobile/lib/data/network/erp_remote_data_source.dart

- - GET /app/api/settings/inventory

- - PATCH /app/api/settings/inventory

- - GET /app/api/settings/store

- - PUT /app/api/settings/store

- - POST /app/api/settings/store/documents/:type

- - PATCH /app/api/shops/me/logo

- - GET /app/api/subscriptions/me

- - POST /app/api/subscriptions/payments

- - GET /app/api/inventory/mode

- - GET /app/api/inventory/layout-tree

- - POST /app/api/inventory/zones

- - PATCH /app/api/inventory/zones/:id

- - DELETE /app/api/inventory/zones/:id

- - POST /app/api/inventory/racks

- - PATCH /app/api/inventory/racks/:id

- - DELETE /app/api/inventory/racks/:id

- - POST /app/api/inventory/shelves

- - PATCH /app/api/inventory/shelves/:id

- - DELETE /app/api/inventory/shelves/:id

- - POST /app/api/inventory/bins

- - PATCH /app/api/inventory/bins/:id

- - DELETE /app/api/inventory/bins/:id

- - GET /app/api/staff

- - GET /app/api/notifications

APIs That Need Fixing In Mobile

- - GET /app/api/dashboard - The backend does not mount a root /dashboard route in

- backend/src/app.ts. Existing dashboard-style endpoints are under reports and

- inventory instead. Source: mobile/lib/data/network/erp_remote_data_source.dart

- - PATCH /app/api/inventory/mode - Backend route is POST /app/api/inventory/mode, not

- PATCH. Source:

- mobile/lib/modules/settings/data/datasources/inventory_layout_remote_data_source.dart

- - PATCH /app/api/purchases/:id - Backend has no update route for purchase detail.
- Current purchase routes are create, list, detail, receive, cancel, returns, approve, reject, and payments. Source:
- mobile/lib/modules/purchases/data/datasources/purchase_remote_data_source.dart
- - PATCH /app/api/expenses/:id and DELETE /app/api/expenses/:id - Backend
- backend/src/routes/expenses.ts currently exposes only GET /expenses and POST /expenses. Source:
- mobile/lib/modules/expenses/data/datasources/expense_remote_data_source.dart
- - GET /app/api/reports/{reportName} - Backend does not expose a generic dynamic report route. It exposes fixed endpoints like /reports/dashboard, /reports/sales/daily, /reports/purchases/summary, /reports/dues/summary, /reports/expenses/summary, /reports/profit-loss, and /reports/stock-value. Source:
- mobile/lib/data/network/erp_remote_data_source.dart

Backend APIs That Still Need Mobile Integration

Bank Accounts

- - GET /app/api/bank-accounts
- - POST /app/api/bank-accounts
- - PUT /app/api/bank-accounts/:id

Brands

- - GET /app/api/brands
- - POST /app/api/brands
- - PUT /app/api/brands/:id
- - DELETE /app/api/brands
- - DELETE /app/api/brands/:id

Money Boxes

- - GET /app/api/money-boxes
- - POST /app/api/money-boxes
- - PUT /app/api/money-boxes/:id

Product Templates

- - GET /app/api/product-templates
- - POST /app/api/product-templates
- - PUT /app/api/product-templates/:id
- - DELETE /app/api/product-templates/:id
- - PUT /app/api/product-templates/:id/products
- - DELETE /app/api/product-templates/:id/products/:productId

Units

- - GET /app/api/units

- - POST /app/api/units
- - DELETE /app/api/units/:id
- - POST /app/api/units/:id/approve

Shop Management APIs Beyond Logo

- - GET /app/api/shops
- - GET /app/api/shops/me/settings
- - PATCH /app/api/shops/me/settings
- - GET /app/api/shops/me/finance-sources
- - POST /app/api/shops/me/money-boxes
- - PUT /app/api/shops/me/money-boxes/:id
- - POST /app/api/shops/me/bank-accounts
- - PUT /app/api/shops/me/bank-accounts/:id
- - GET /app/api/shops/me/inventory-settings
- - PATCH /app/api/shops/me/inventory-settings
- - GET /app/api/shops/me/taxes-charges
- - POST /app/api/shops/me/taxes
- - POST /app/api/shops/me/charges
- - PATCH /app/api/shops/me/taxes/:id
- - PATCH /app/api/shops/me/charges/:id
- - DELETE /app/api/shops/me/taxes/:id
- - DELETE /app/api/shops/me/charges/:id

Customer Read APIs Not Yet Used In Mobile

- - GET /app/api/customers/:id/sales
- - GET /app/api/customers/:id/ledger
- - GET /app/api/customers/sales/closing-summary
- - GET /app/api/customers/sales/:saleId

Supplier Read And Admin APIs Not Yet Used In Mobile

- - GET /app/api/suppliers/:id
- - PUT /app/api/suppliers/:id
- - PATCH /app/api/suppliers/:id/status
- - GET /app/api/suppliers/:id/dues
- - GET /app/api/suppliers/:id/payments
- - GET /app/api/suppliers/:id/purchases
- - GET /app/api/add-suppliers/* alias routes

Purchase Admin APIs Not Yet Used In Mobile

- - POST /app/api/purchases/:id/payments
- - GET /app/api/purchases/:id/returns
- - PATCH /app/api/purchases/:id/approve
- - PATCH /app/api/purchases/:id/reject

Product APIs Not Yet Used In Mobile

- - GET /app/api/products/:id/barcode.svg
- - POST /app/api/products/:id/duplicate
- - GET /app/api/products/approval-requests
- - PATCH /app/api/products/approval-requests/:id/approve
- - PATCH /app/api/products/approval-requests/:id/reject
- - PATCH /app/api/products/:id/status

Inventory APIs Not Yet Used In Mobile

- - GET /app/api/inventory/dashboard
- - GET /app/api/inventory/attention
- - GET /app/api/inventory/general-store
- - GET /app/api/inventory/zones
- - GET /app/api/inventory/racks
- - GET /app/api/inventory/shelves
- - GET /app/api/inventory/bins
- - POST /app/api/inventory/placements

Reports APIs

- - GET /app/api/reports/dashboard
- - GET /app/api/reports/sales/daily
- - GET /app/api/reports/purchases/summary
- - GET /app/api/reports/dues/summary
- - GET /app/api/reports/expenses/summary
- - GET /app/api/reports/profit-loss
- - GET /app/api/reports/stock-value

Notifications Write APIs

- - GET /app/api/notifications/settings
- - PUT /app/api/notifications/settings
- - POST /app/api/notifications
- - PUT /app/api/notifications/read
- - DELETE /app/api/notifications

Staff Detail/Admin APIs

- - GET /app/api/staff/me/performance
- - GET /app/api/staff/:staffUserId
- - PATCH /app/api/staff/:staffUserId/permissions
- - POST /app/api/staff/:staffUserId/pin-reset
- - PATCH /app/api/staff/:staffUserId/status

Auth Flows Not Yet Hooked In Mobile

- - POST /app/api/auth/register-salesman
- - POST /app/api/auth/register-owner-draft
- - POST /app/api/auth/setup-pin
- - POST /app/api/auth/complete-registration
- - POST /app/api/auth/pre-login
- - POST /app/api/auth/owners-login
- - POST /app/api/auth/salesmans-login
- - POST /app/api/auth/send-owner-login-otp
- - POST /app/api/auth/owners-login-otp
- - POST /app/api/auth/salesmans-login-otp
- - POST /app/api/auth/send-login-otp
- - POST /app/api/auth/verify-login-otp
- - POST /app/api/auth/owners-verify-otp
- - POST /app/api/auth/salesmans-verify-otp
- - PATCH /app/api/auth/me
- - PATCH /app/api/auth/me/password
- - PATCH /app/api/auth/me/avatar

Recommended Next Work

- - Fix the broken mobile calls first: /dashboard, generic /reports/{reportName}, PATCH /inventory/mode, PATCH /purchases/:id, and item-level expense update/delete.
- - After that, the highest-value missing integrations for daily mobile workflows are shop settings, supplier detail/dues/payment history, customer ledger/sales history, purchase approval/payment history, and reports.
- - If you want tighter mobile coverage for owner operations, the next route groups to wire are bank-accounts, money-boxes, units, brands, and notifications write actions.
